JULY 1991 OUT-OF-SPECIFICATION ANALYTICAL RESULT SUMMARY - JMK-0460-91

Attached please find the Monthly Out-of-Specification Results Summary for July 1991 All of the Out-of-Specification analytical results reported in July were compared with station and analyte specific historical data. A summary of the special correspondence for July is listed below

Pond A-3 Effluent, Pond A-4 Effluent, and W&I was reported to exceed the regulatory threshold with respect to Americium-241 A-3 Pond and W&I are considered critical stations and are not NPDES monitoring points. A-4 Pond is considered a critical station and is an NPDES monitoring point. Sample reanalysis has been requested

None of the reported Out-of-Specification results are of immediate concern or warrant increased investigation. EMAD will continue to closely monitor analytical results and continue to inform DOE of future developments and reanalysis results

If you have any questions regarding this, please contact M B Arndt at extension 4294
